

Professional Tizen Application Development

By Cheng Luo, Hojun Jaygarl, Eunyoung Choi

John Wiley Sons Inc, United States, 2014. Paperback. Book Condition: New. 1. Auflage. 228 x 184 mm. Language: English . Brand New Book. Create powerful, marketable applications with Tizen for the smartphone and beyond Tizen is the only platform designed for multiple device categories that is HTML5-centric and entirely open source. Written by experts in the field, this comprehensive guide includes chapters on both web and native application development, covering subjects such as location and social features, advanced UIs, animations, sensors and multimedia. This book is a comprehensive resource for learning how to develop Tizen web and native applications that are polished, bug-free and ready to sell on a range of smart devices, beyond just smartphones. Tizen is an open source platform that is housed within the Linux Foundation and is fully supported by Intel, Samsung and the Tizen Association. Professional Tizen Application Development: * Explains how web applications can combine HTML5 features with Tizen device APIs to unleash the full potential of the Tizen platform * Provides detailed, practical explanations of the most important Tizen native APIs * Demonstrates best practices for adding key features like location, contacts and calendars to your apps * Shows you how to use advanced features such as animations,...

Reviews

An incredibly awesome publication with perfect and lucid reasons. It can be written in simple phrases and not confusing. I am just delighted to let you know that this is actually the very best publication I actually have studied during my very own lifestyle and could be the best publication for actually.

-- Paula Gutkowski

It is one of the most popular publications. It is actually written in easy words instead of confusing. You will like how the author created this book.

-- Art Gislason
