By Harry Bischoff Weiss

Forgotten Books, United States, 2015. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from The More Important Nursery Insects in New Jersey This circular is intended primarily for nurserymen, and, in view of the fact that at least 90 per cent of the nursery area of New Jersey is devoted to the growing of ornamental plants, only those insects injurious to such plants have been treated. All of the species mentioned herein have been found in nurseries. General Appearance. - The boring larva which is responsible for the injury is a fleshy caterpillar, pale yellow with a pinkish tinge and having the body covered with large dark tubercles. The adults are striking moths with white wings spotted with black dots, the females being larger than the males.
