Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.The U.S. Environmental Agency (EPA) is charged by Congress with protecting the nation s land, air, and water resources. Under a mandate of national environmental laws, the Agency strives to formulate and implement actions leading to a compatible balance between human activities and the ability of natural systems to nurture life. To meet this mandate, EPA s research program is providing data and technical support for solving environmental problems today and building a science knowledge base necessary to manage our ecological resources wisely, understand how pollutants affect our health, and prevent or reduce environmental risks in the future. The National Risk Management Research Laboratory is the Agency s center for investigation of technological and management approaches for reducing risks from threats to human health and the environment. The focus of the Laboratory s research program is on methods for the prevention and control of pollution to air, land, water and subsurface resources; protection of water quality in public water systems; remediation of contaminated sites and ground water; and prevention and control of indoor air pollution. The goal of...
