## FAR- AND NEAR-FIELD CHARACTERIZATION OF SMALL RADIATION SOURCES

LAP Lambert Acad. Publ. Okt 2010, 2010. Taschenbuch. Condition: Neu. Neuware - This book presents experimental studies on small radiation sources such as subwavelength apertures, photonic crystal lasers, and microdisk lasers in their far- and near-field regimes. For the far-field characterization of highly divergent emissions, a solid angle scanner which is capable of scanning a detector and necessary optics over the surface of a sphere centered at the sources is developed. Polarization-resolved two-dimensional angular distributions are measured with this instrument....
